BISH'S
STEEL FABRICATION & MFG.

Environmental Policy

Bish's recognizes the importance of being good stewards of the environment and reducing our impact.

Bish's is committed to:

- Following the Federal, State, and Local regulations in regards to our operations including the Utah Indoor Clean-Air Act.

- Reducing air pollution along the Salt Lake Valley. With vehicles being one of the top polluters in the Salt Lake Valley, we evaluate ways to combine and minimize our shipping, receiving, and delivering of products.

- 3Rs of Reduce, Reuse, and Recycle. We "Reduce" by following lean procurement practices and digitizing various paper documents, we "Reuse" by using remnant material and finding ways to repurpose tools and equipment, and we "Recycle" our metal waste, paper and office supplies.

- Reducing general pollutants by using biodegradable cleaners and disposing of waste water appropriately.

- Identifying all Hazardous Substances (chemicals, waste, and other materials posing a hazard to humans or the environment) on our premise and labeling them, ensuring their safe handling, movement, use, and disposal (recycling, reuse, or sending to the proper 3rd Party Hazardous Waste Disposal Facility.)

- Reducing energy consumption by reducing electrical demand and replacing failing items with energy efficient items.

- Water Management by using water conserving standards as outlined by our water service provider.

- Reevaluating our processes and procedures as technology continues to advance.
